

Support the Immune System to fight the Coronavirus

The body's enemies take on many forms — everything from environmental contaminants to seasonal changes. They're virtually everywhere, hoping to capitalize on a moment of weakness. It's a fight that never stops. It's a fight that we want to win.

Though we can't make the immune system invincible to these pressures, we can make it more prepared. Standard Process and MediHerb® offer a number of products that support your patients, some of their products include those listed below.

Cataplex A-C helps support immune system function and maintains healthy cells and tissues

Calcium Lactate supports absorption of calcium and magnesium.

Zinc Liver Chelate is used for short-term support of healthy immune system response function and skin health.*

Cataplex E keep the immune system strong against viruses and bacteria.

Congaplex is used for short-term support of the immune system.

Immuplex blends essential micronutrients and minerals as well as Protomorphogen™ and Cytosol™ extracts to support the immune system.

Echinacea Premium combines the roots of *Echinacea angustifolia* and *Echinacea purpurea* to enhance healthy immune system function.

Viranon help maintain and support healthy immune system function, regulation and response

There are also many more Quality Supplements for Immune System Support
